JAMES CROPPER

MANUFACTURED IN GREAT BRITAIN

EMBOSSING PALETTE

Feeling is believing and the versatile surface of James Cropper papers can be made to take on forms that are as intriguing to the touch as they are beautiful to the eye.

Why not heighten tactility and add visual impact with one of the textured designs in the James Cropper collection?

James Cropper offers a choice of more than 30 different embossing patterns including textile weaves, leathers, rippling effects and intricate geometrics in grid, spot or linear formations to further enhance our premium papers and boards. Bespoke patterns can also be developed if required.

ENHANCEMENTS

WATER-BASED VARNISH

Whilst a simple clear gloss or matt water-based varnish can enhance the appearance of the paper, it also improves resistance to scuffing and finger-marking. A gloss varnish reflects back the light and makes the base colour appear richer and more vivid. A matt varnish gives the surface a satin look with a discreet sheen.

HOT PRESS

To give increased clarity and depth to the textured finish, embossing patterns can be applied using a Hot Press heating method.

BESPOKE PATTERNS

Individual and unique textures can help design reach new heights. If you are interested in creating a unique paper then James Cropper will work closely with you to create a custom design and explore the development of an individual colour.

Adding surface interest to a paper in combination with colour can provide a market-leading edge, whether using one of the designs in the James Cropper portfolio or creating a tailor-made design.

If you are interested in developing a custom design, please contact the James Cropper sales team in the first instance.

PLEASE NOTE: THE MAXIMUM EMBOSSING WIDTH FOR EACH DESIGN VARIES WITH PAPER WEIGHT

ELEVATE YOUR BRAND

Our state of the art embossing facilities enable us to offer tactile enhancement for any project. Elevating your brand's presence, our exception embossing capabilities are characterised by:

DIVERSE PATTERNS

Choose from over 30 unique embossing patterns, including textile weaves, leathers, rippling effects, and intricate geometrics. Our extensive range ensures your products stand out with distinctive textures.

CUSTOMISATION

Tailor-made embossing patterns are our specialty. We work closely with you to develop bespoke solutions that perfectly align with your brand's vision, making your packaging truly one-of-a-kind.

CUTTING-EDGE TECHNOLOGY

Leveraging advanced technology inspired by Formula 1, our embossing centre uses optical 3D metrology to scan hundreds of thousands of measurement points in just five seconds. This precision guarantees the highest quality in every textured paper we produce.

FLEXIBLE PRODUCTION

Whether you need high-volume production or short, bespoke runs, our state-of-the-art embosser varnisher and fleet of embossing machines are equipped to handle your needs efficiently and effectively.

COMMITMENT TO SUSTAINABILITY

We are dedicated to eco-friendly practices, from using green electricity to reducing our carbon emissions. Our embossing services reflect this commitment, offering you sustainable solutions without compromising on quality.

CONTRACT EMBOSSING

Unlock your full brand potential with James Cropper's contract embossing service. Whether your paper is sourced from our mill or elsewhere, leverage our expertise and state-of-the-art equipment to enhance it with distinctive textures and patterns.

Our full range of standard emboss patterns are available for contract embossing, or we can help in developing bespoke patterns if required.

Please get in touch to find out more about how to partner with James Cropper for your contract embossing needs.
